FROM THE FOUNDER

Built by an athlete, for athletes.

Freshtrax exists because one person refused to accept that smelly shoes were just part of the game.

I spent over a decade in sales, working my way up to managing national accounts across the US and Canada. Then an employer clawed back a six-figure commission I'd earned over a year — money meant for my wedding. In one afternoon I learned you're not a partner, you're a line item. I decided no one would hold the eraser to my income again.

Around the same time, my own shoes had become the problem. I play racket sports two or three times a week, and no spray or insert touched the smell — eventually it turned into athlete's foot. The bacteria causing it live deep in the fibres, where sprays never reach.

Then I saw a helmet sanitization kiosk going viral across Asia. I flew out to customize the technology for footwear — to solve my own problem, and to bring the concept to North America, where nothing like it existed. That's Freshtrax: a three-stage sanitization kiosk that eliminates what sprays can't reach, in under 90 seconds.

I built it for income that works whether I'm in the room or not — and for everyone who plays hard and wants something that's truly theirs.

"Leave your mark, not your smell."

— Marvin N., Founder, Freshtrax

WHAT YOU NEED TO KNOW FIRST

The smell is the symptom. The biology is the business.

Until you see what's actually living inside a pair of gym shoes after one sweat session, the scale of this opportunity doesn't compute.

Sweat is nearly odorless. The smell is produced by bacteria metabolizing sweat compounds deep inside shoe material and releasing volatile acids — isovaleric, propionic, butyric. These bacteria live **inside the fibres**, not on the surface. Sprays neutralize the acid. They never touch the bacteria producing it. Within hours, the cycle restarts.

Current products sell the illusion of clean. A \$12 deodorizing spray buys 4–6 hours of relief while the bacterial colony stays alive, metabolizing, and growing. The odor returns. The customer buys another can. Nobody has built a product that solves the problem at its root — until now.

Three things make this commercially rare:

1

It renews itself

Every 45–90 minute session in court shoes restarts the cycle. This is a per-visit habit, not a one-time purchase.

2

Zero acquisition cost

The customer is already standing next to the machine. The venue's foot traffic is your traffic.

3

Priced like a coffee

A 90-second cycle sold to people who walk past it 3–5 times a week with the problem on their feet.

THE SOLUTION

How Freshtrax eliminates what sprays can't reach — in under 90 seconds.

Freshtrax runs a three-stage sanitization protocol. Each stage targets a different vulnerability of the pathogens living inside footwear, reaching the insole, midsole, and toe box that sprays and inserts never touch.

The whole cycle finishes in under 90 seconds. The athlete drops their shoes in, taps to pay, and walks away with gear that's genuinely clean — not briefly masked.

UV-C and ozone are recognized sanitization methods. Freshtrax pairs them with an antimicrobial vapor layer for residual protection after the cycle ends.

THE SOLUTION

The three sanitization stages

STAGE 01 · OZONE (O₃)

Breaks down odor and bacteria at the molecular level

Ozone is one of the most powerful oxidizing agents known. It breaks down the cell walls of microorganisms throughout the full interior of the shoe and simultaneously neutralizes the volatile organic compounds responsible for odor — eliminating both the bacteria and the byproducts they produce.

STAGE 02 · UV-C + HEAT

Disrupts microbial DNA where ozone can't reach

A targeted UV-C and heat cycle penetrates deep into the shoe's interior, disrupting microbial DNA on contact — reaching the hard surfaces and seams that a single-method system leaves behind.

STAGE 03 · ANTIMICROBIAL VAPOR

Leaves a residual barrier against regrowth

A final antimicrobial vapor layer — supplied by Freshtrax — deposits an invisible barrier that continues to inhibit microbial regrowth for hours after the cycle, extending freshness well beyond any single-pass system.

THE OPPORTUNITY

A proven model. An untouched continent. Zero competition.

For over a decade, automated footwear hygiene has been a standard amenity across Asia. Walk into a gym in Tokyo or a sports complex in Shanghai and you'll find a sanitization kiosk near the entrance the same way you'd find a water fountain in a North American gym. The model is proven. The playbook exists.

Here's the part that should stop you cold: not one owner has brought this to North America.

\$1B+ GLOBAL MARKET BY 2025	64M+ US GYM MEMBERSHIPS	36M+ PICKLEBALL PLAYERS	0 COMPETITORS IN N. AMERICA
--	-----------------------------------	-----------------------------------	--

No kiosk. No brand. No competitor. Thousands of courts, clubs, and gyms — without a single automated footwear kiosk. Not because the demand isn't there. Simply because nobody moved first.

First-mover advantage here isn't a cliché — it's structural.

No competing kiosk can enter it. You're not racing to build a brand.
You're racing to place machines.

Where the venues are

You don't need a Tier 1 city. You need one good venue in whatever city you're in. These counts show how much unclaimed ground exists in the largest markets.

Tier 1 Markets

CITY / MARKET	GYMS & CENTRES	RACKET SPORTS	INDOOR BASKETBALL
Los Angeles, CA	2,813	122	135
New York City, NY	1,838	111	162
Chicago, IL	1,215	80	260
Toronto, ON	1,085	63	68
Vancouver, BC	682	45	24

Tier 2 Markets

CITY / MARKET	GYMS & CENTRES	RACKET SPORTS	INDOOR BASKETBALL
Montreal, QC	541	41	36
Seattle, WA	412	36	28
Denver, CO	365	29	34
Calgary, AB	322	24	15
Austin, TX	248	20	12

Racket Sports = indoor tennis / pickleball / badminton / paddle courts. Estimates based on Google and Yelp business listings.

What one kiosk pays back

Every number here is built on one founding kiosk, the same three inputs, and a full 365-day year. Figures are **net** — after operating cost and your \$79/month platform fee. Your founding kiosk carries **0% revenue share, for life**. All amounts shown in USD.

\$4.00 AVG REVENUE / CYCLE	-\$0.55 OPERATING COST / CYCLE	\$3.45 NET PER CYCLE (0% REV SHARE)
--------------------------------------	--	---

ONE \$7,850 KIOSK PAYS FOR ITSELF IN

3.9 months

That's the typical (base) case at 20 cycles a day. Push to 30 and it's **2.6 months**. Even the conservative 10-a-day case clears it in **8.1 months** — inside year one.

Time to full payback, by scenario

Optimistic · 30/day		2.6 mo
Base · 20/day		3.9 mo
Conservative · 10/day		8.1 mo

Payback = \$7,850 kiosk cost ÷ monthly net. Net per cycle: \$4.00 gross – \$0.55 operating cost = \$3.45 (0% revenue share on your founding kiosk). \$79/month platform fee is deducted from the monthly total before payback is calculated.

Conservative to optimistic — one kiosk

Same machine, same inputs. The only variable is daily cycle volume, which comes down to one thing: the venue. Conservative is roughly one use per hour over a 10-hour day.

PER FOUNDING KIOSK (USD)	CONSERVATIVE	BASE (TYPICAL)	OPTIMISTIC
Cycles / day	10	20	30
Daily net	\$34.50	\$69.00	\$103.50
Monthly net	\$970	\$2,019	\$3,067
Annual net (Year 1)	\$11,645	\$24,237	\$36,830
Payback timeline	8.1 mo	3.9 mo	2.6 mo
Year 1 cash-on-cash	148%	309%	469%
Year 2 net profit	\$15,440	\$40,624	\$65,810

Read the typical case, not the best one

We lead with the base case on purpose. \$24,237 in Year 1 net on a \$7,850 machine is the number to plan around. The optimistic case is real, but it's the ceiling, not the promise.

Year 2 is mostly profit

The kiosk is a one-time cost. Once it's paid back in Year 1, almost everything it earns after that is profit — which is what funds your second machine.

Projections assume consistent daily cycle volume over 365 days and are estimates, not guarantees of income. Actual results depend on venue traffic and usage. Year 2 net profit = (annual net × 2) – \$7,850 kiosk cost.

TWO PATHS TO OWN

You don't have to own a fitness centre to own a kiosk.

Freshtrax works two ways. Same machine, same founding terms — different starting point. Pick the one that's you.

PATH A · YOU OWN A VENUE

Add a kiosk to the floor you already run.

You operate a gym, club, or court facility. A Freshtrax kiosk is a premium amenity, a new revenue line, and cleaner floors — with placement already solved, because the foot traffic is yours on day one.

- Your model is the **one-kiosk ROI** on the previous pages — payback in as little as 3.9 months.
- Members notice the amenity; it differentiates you from the gym down the road.
- Lowest-effort path: no venue hunting, no placement risk.

PATH B · YOU PLACE KIOSKS

Build a portfolio of machines in other people's venues.

You don't own a venue — you acquire placements. You secure high-traffic gyms and clubs, place kiosks, and earn recurring income while you sleep. We help you find and close the venues.

- Your model is the **scaling roadmap** on the next page — one kiosk funds the next.
- Placement support and territory mapping are included with founding terms.
- Highest-ceiling path: a single owner can run a city.

Both paths buy the same kiosk at the same founding price, with the same 0% revenue share on the founding machine.

From one kiosk to \$10,000 a month

One kiosk in one good venue at 20 cycles a day pays for itself in under four months. The money it earns after that funds kiosk two. Kiosk two funds kiosk three. The math compounds.

KIOSKS	MONTHLY NET	ANNUAL NET	MILESTONE
1	\$2,020	\$24,237	Prove the model
2	\$3,898	\$46,774	Reinvest & expand
3	\$5,776	\$69,311	Kiosk 1 fully recovered
6	\$11,410	\$136,922	\$10K MRR threshold
10	\$18,923	\$227,070	Portfolio owner
20	\$37,703	\$452,440	Territory dominant

All figures in USD. Base case, 20 cycles/day per kiosk. Founding kiosk nets \$3.45/cycle at 0% rev share and \$79/mo platform fee; each additional kiosk is standard (5% rev share, \$99/mo platform fee). Estimates, not guarantees of income.

The 3-phase playbook

MONTHS 1-3

Deploy & validate

Place kiosk one in your best Tier 1 venue. Target 15–20 cycles/day.

MONTHS 4-6

Reinvest & expand

First machine's revenue funds kiosk two. You now run a small fleet.

MONTHS 7-12

Lock the territory

Kiosks three to five deployed. Kiosk one is fully paid off — pure profit from here.

You don't need capital, debt, or years of patience. You need one kiosk, one good venue, and the discipline to reinvest for twelve months.

OWNER VISIBILITY

Every cycle tracked. Every dollar visible. In real time.

Freshtrax gives you a full-visibility dashboard to manage every aspect of your kiosk remotely. Your kiosk, your data, your control — from your phone.

DATA OVERVIEW

ORDER MANAGEMENT

CAPABILITY	WHAT IT DOES FOR YOU
Payment management	Nayax POS — Apple Pay, Google Pay, cards, and cash, with no friction at the machine.
Coupons & discounts	Drive repeat visits and upsell through targeted, time-boxed deals.
Data overview	Make data-driven calls on hours, placement, and pricing from live usage.
Remote device control	Monitor and adjust hardware remotely — saving time and service costs.
Fault reporting	Catch issues early and minimize downtime to protect revenue.
Role management	Assign the right access to the right people as your fleet grows.

Freshtrax handles maintenance remotely, runs a quarterly system check, and restocks your antimicrobial vapor — so your role stays placement and occasional check-ins.

THE OFFER

What you get as a Founding Owner — and what it costs.

We could open this to anyone. We're not. Twenty people get to enter this market at founding terms — before it has a name, before territories fill, before the window closes.

Freshtrax kiosk — fully assembled and tested Ships ready to deploy. Plug in, place it, live from day one.	\$8,850 \$7,850
Tier 1 venue placement support We help you identify and close your first high-traffic gym, club, or court placement.	\$1,500 value
Territory strategy onboarding call 1:1 session to map your local Tier 1 venues and prioritize deployment.	\$500 value
First-mover exclusivity on claimed locations Once you claim a venue, no competing kiosk can be placed there.	Exclusive
Platform fee locked at \$79/month for life Standard rate is \$99/month. Locked for your founding kiosk, permanently.	\$240/yr saved
Total value	\$11,090+

YOUR INVESTMENT AS A FOUNDING OWNER (USD)

\$7,850

One-time kiosk purchase · \$79/month platform fee · **0% revenue share on your founding kiosk, forever**

Founding Owner pricing and the fee waiver close permanently once all 20 slots are filled. Territory exclusivity is first-come, first-served. Multi-kiosk pricing available on request.

THE PERFORMANCE GUARANTEE

If the model doesn't perform, you don't keep the kiosk.

Follow the Freshtrax owner playbook and place your kiosk in a qualified venue. If it doesn't hit **10 cycles per day within 90 days** of placement, I'll refund the kiosk in full. You cover return shipping. That's it.

Your downside is the cost to ship a machine back. Your upside is a business that pays itself off inside a year and runs while you sleep.

The risk was never the \$7,850. The risk is watching someone else lock your territory while you think about it.

The questions we get asked

Q I've never run a kiosk business before.

Neither had our first owners. The kiosk runs itself — no staff, no inventory, no daily management. Your role is placement and occasional check-ins. If you can check an app and make a phone call, you can run this.

Q What if my venue doesn't generate enough traffic?

Venue selection is the only variable that matters — which is why placement support is included. Most Tier 1 venues see 150–400 visits a day; at a 5% usage rate you're at target. If a venue underperforms, we help you relocate.

That's in the guarantee.

Q What stops a gym from just buying their own kiosk?

Sourcing requires direct manufacturer relationships in Asia, custom engineering, and ongoing technical support. A gym's business is members, not machines. The model gives them a premium amenity at zero cost and zero effort — there's no reason for them to own it.

Q What if someone copies this once it takes off?

Eventually someone will try. But your advantage isn't just brand — it's physical. Once your kiosk is in a venue, no competing kiosk enters it. You're not racing to build a brand. You're racing to place machines.

Q The ROI looks optimistic. What if I don't hit 20 cycles a day?

Our conservative scenario is 10 cycles a day. At that rate you still clear \$11,645 in Year 1 net on a \$7,850 investment, with full payback in 8.1 months.

QUESTIONS & ANSWERS

Q Why only 20 Founding Owner slots? Is this a sales tactic?

It's a capacity constraint. Founding Owners get hands-on placement support and direct access to our team, and we can't deliver that to unlimited people. When slots fill, the fee waiver ends, pricing rises, and the best venues in your city may already be claimed.

Q Is this a franchise, MLM, or scheme?

No. No royalties, no recruiting. You own the kiosk outright and keep the profit. It's a straightforward kiosk business — nothing more.

Q What exactly is the guarantee?

Follow the Freshtrax owner playbook (provided at onboarding) and if your kiosk doesn't hit 10 cycles a day within the first 90 days of placement, you get a full refund on the kiosk cost. You just cover the cost of shipping it back.

Q My partner needs convincing. How do I explain it?

Show them this document and the ROI pages. The question is simple: if a \$7,850 investment generates roughly \$24,237 in Year 1 and pays itself back in under four months, what's the cost of not doing it? The risk isn't the \$7,850 — it's watching someone else lock your territory first.

Q Are these income figures guaranteed?

No. Every figure in this document is an estimate based on stated cycle volumes, not a guarantee of income. Actual results depend on your venue, traffic, and usage. We lead with the typical case for exactly this reason.

NEXT STEPS

If this made sense to you — let's talk.

You've seen the science, the market, and the numbers. The only question left is whether your territory is still available.

01 Book a free 30-minute discovery call

We check territory availability in your market, walk through the ROI for your specific venue targets, and answer every question. No pitch, no pressure.

02 We map your territory

Before you commit to anything, we identify the exact Tier 1 venues near you and tell you which are still unclaimed.

03 You decide

If it makes sense, you move forward as a Founding Owner. If it doesn't, you walk away with more market intelligence than you came in with.

[Book your discovery call →](#)

30 minutes. Free. No obligation. Or text **TERRITORY** to **+1 778 898 8063** for a free availability report for your city.
