

There's a \$1B market.

Nobody owns it yet.

This blueprint shows you exactly **what the opportunity is, why it exists, what the technology does** — and **what the numbers look like** for operators who move first.

FROM THE FOUNDER

A Letter to Future Partners:

The Journey Behind the Kiosk

My journey to founding Freshtrax began with two things: a drive to build something that no employer could take from me, and a pair of shoes that were genuinely offensive.

After moving from Malaysia to Canada, I spent over a decade in the sales trenches — which, in the restaurant world, means getting told “no” in several different languages until you finally get a “yes.” I worked my way up to managing national accounts across the US and Canada, closing deals with some of the largest restaurant groups on the continent. I was good at it. I built relationships. I delivered results. And then my employer decided my six-figure commission cheque — money I had been earning for over a year, money I was planning to use for my wedding 6 months away — looked better in their account than mine.

In one afternoon, I learned what hard and loyal work actually means to a corporation: nothing. You aren’t a partner. You’re a line item that can be deleted to balance a spreadsheet. I decided that day I would never let someone else hold the eraser to my income again.

Around the same time, I was dealing with a different problem. I play racket sports two or three times a week — badminton, tennis, whatever I can get a court for. My shoes had developed a scent so potent it didn’t just smell, it had a personality. My fiancé would wrinkle her nose every time I got in the car after a game. I tried everything: sprays, charcoal inserts. Nothing worked beyond a few hours. Eventually I developed athlete’s foot — a direct consequence of bacteria that no spray was actually killing, just briefly masking.

I didn’t want another band-aid. I wanted a system that actually solved the problem.

Then I saw an Instagram post about a helmet-sanitizing kiosk operating across Asia. I didn’t send an inquiry email. I didn’t add it to a wishlist. I booked a flight to the factory.

What I found was a model that had been operating profitably for over a decade across Japan, South Korea, and China — and a complete absence of it anywhere in North America. I worked directly with the manufacturer to adapt the technology for footwear. The result is Freshtrax: a three-stage, medical-grade sterilization kiosk that eliminates what sprays can’t reach, in 90 seconds.

I built this because I needed income that would take care of me whether I was working or not — income that couldn't be stolen by an employer, cut in a restructuring, or eliminated in an afternoon. And I built it because I know I'm not the only one. There are thousands of people who play hard, work hard, and want to build something that works even when they're not in the room. Freshtrax is designed to be that — for me, and for every operator who partners with us.

With my best regards,

“Leave your mark, not your smell”

Marvin N.

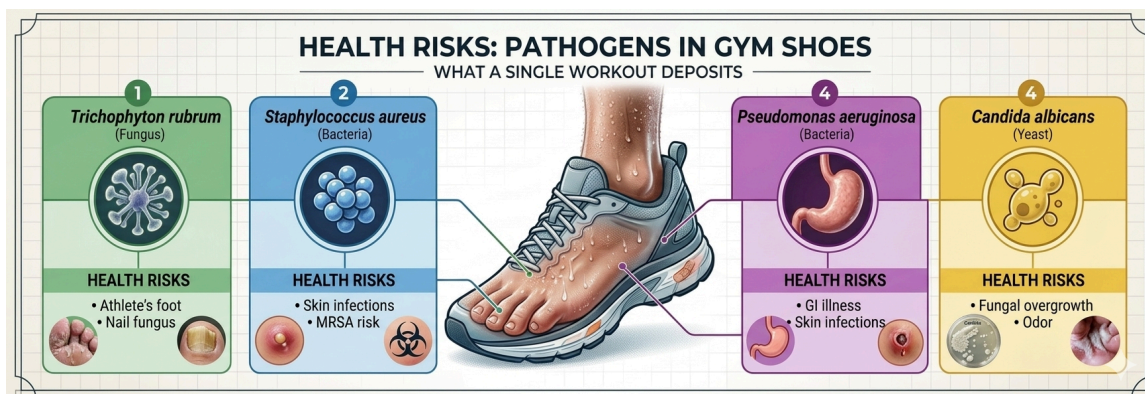

Founder, Freshtrax

WHAT YOU NEED TO KNOW FIRST

WHAT YOU NEED TO KNOW ... FIRST

The things multiplying inside your shoes after every workout session.

Let's first understand the problem. Because until you see what's actually living inside a pair of gym shoes after one sweat session, the scale of this opportunity doesn't compute.

Why the smell is the symptom — not the problem

Sweat is nearly odorless. The smell is produced by bacteria metabolizing sweat compounds inside shoe material and releasing volatile acids: isovaleric acid, propionic acid, butyric acid. These bacteria live inside the fibres — not on the surface. Sprays neutralize the acid. They do not touch the bacteria producing it. Within hours, the cycle restarts.

Current products are selling the illusion of clean. A \$12 deodorizing spray gives consumers 4–6 hours of relief. The bacterial colony is alive, metabolizing, and growing. The odor returns. The customer buys another can. Nobody has built a product that actually solves the problem at its root — until now.

THE SOLUTION

THE SOLUTION

How Freshtrax eliminates what sprays can't reach — in 90 seconds.

Freshtrax uses a 3-stage medical-grade sterilization protocol. Each stage targets a different vulnerability of the pathogens living inside footwear.

The 3 sterilization stages

Ozone (O₃)

is one of the most powerful oxidizing agents known. It breaks down the cell walls of microorganisms at the molecular level — penetrating the full interior of the shoe: insole, midsole, toe box. It simultaneously neutralizes the volatile organic compounds responsible for odor, eliminating both the bacteria and the byproducts they produce.

UV-C + Heat Stage

A targeted UV-C and heat cycle penetrates deep into the shoe's interior, destroying microbial DNA on contact — reaching areas ozone alone cannot.

Antimicrobial Vapor

A final **antimicrobial vapor** layer provides residual protection after the cycle. It deposits an invisible barrier that continues to inhibit microbial regrowth for hours post-treatment — extending freshness well beyond any single-pass system.

THE OPPORTUNITY

THE OPPORTUNITY

A proven model. An untouched continent. Zero existing competition.

For over a decade, automated footwear hygiene has been a standard amenity across Asia. Walk into a gym in Tokyo or a sports complex in Shanghai and you'll find a sterilization kiosk near the entrance the same way you'd find a water fountain in a North American gym. The model is proven. The playbook exists.

Here is the part that should stop you cold.

Not one operator has brought this to North America.

No kiosk. No brand. No competitor. Sixty-four million gym memberships, 36 million pickleball players, thousands of courts and clubs — all without a single automated footwear kiosk. Not because the demand isn't there. Simply because nobody moved first.

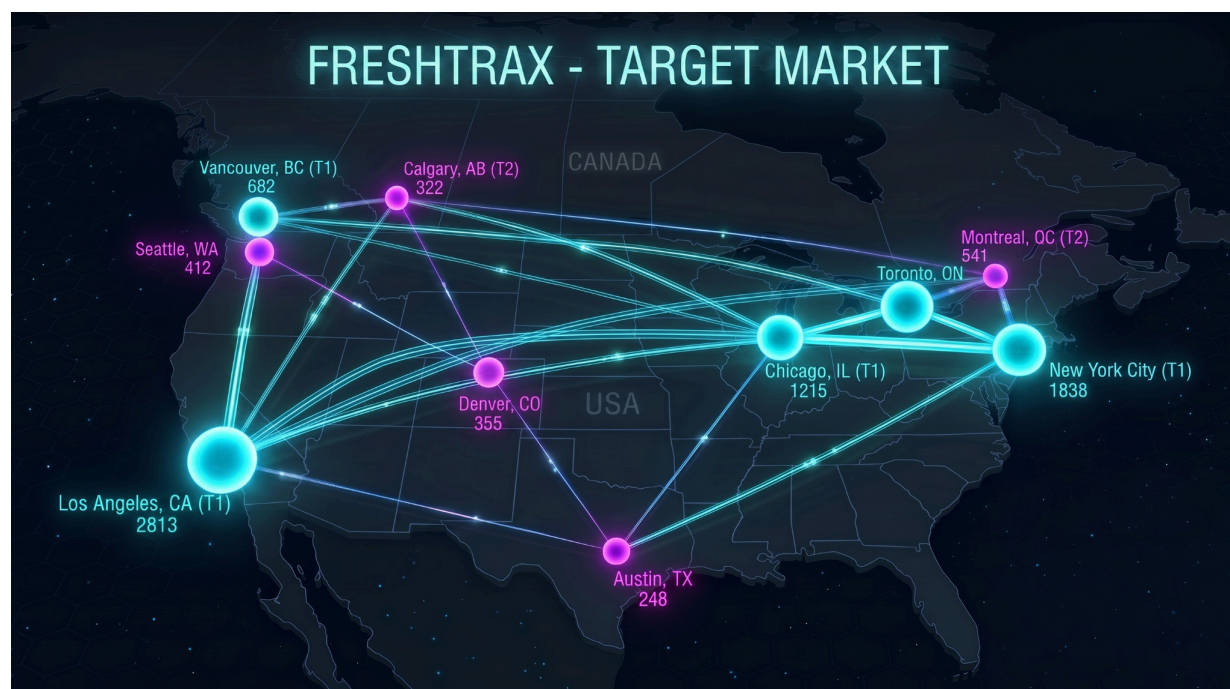

That window is open right now. It will not stay open.

Vancouver has 682 venues. Toronto has 1,085. Los Angeles has 2,813. Every one is available to the first operator who moves. The moment a kiosk is placed, that venue is locked — no competitor can enter it.

Every month you wait is a potential \$3,067 in revenue you didn't earn — and a shrinking pool of unclaimed venues.

The only question is whether you act before someone else in your city does.

Tier 1 target markets (not limited) — North America

Tier 1 Markets

City / Market (Tier)	Gym/Fitness & Community Centres	Racket Sports - Tennis/Pickleball/Badminton/Paddle	Indoor Basketball Courts
Los Angeles, CA (T1)	2813	122	135
New York City, NY (T1)	1838	111	162
Chicago, IL (T1)	1215	80	260
Toronto, ON (T1)	1085	63	68
Vancouver, BC (T1)	682	45	24

Tier 2 Markets

City / Market (Tier)	Gym/Fitness & Community Centres	Racket Sports - Tennis/Pickleball/Badminton/Paddle	Indoor Basketball Courts
Montreal, QC (T2)	541	41	36
Seattle, WA (T2)	412	36	28
Denver, CO (T2)	365	29	34
Calgary, AB (T2)	322	24	15
Austin, TX (T2)	248	20	12

Estimates based on Google and Yelp business listings

THE ECONOMICS

THE ECONOMICS - TRANSPARENT

What one kiosk earns. Three scenarios — conservative to optimistic.

Every number below uses the same inputs: blended average revenue of \$4.05/cycle (\$3.65 Basic Fresh + \$4.35 Max Fresh divided by 2), \$0.55 per-cycle operating cost, **0% rev share**.

*Platform fee of \$79/month per kiosk (Found Partner rate) is already deducted from all monthly and annual figures below.

\$4.00	\$0.55	\$3.25
Avg. revenue / cycle	Operating cost / cycle	Net per cycle

	Conservative 10 cycles / day	Base 20 cycles / day	Optimistic 30 cycles / day
Daily net	\$34.50	\$69.00	\$103.50
Monthly net	\$970	\$2,019	\$3,067
Annual net	\$11,645	\$24,237	\$36,830
ROI timeline	8.1 months	3.9 months	2.6 months
Yr 1 cash-on-cash	148%	309%	469%
Yr 2 net profit	\$15,440	\$40,624	\$65,810

Projections assume consistent daily cycle volume over 365 days. Conservative = approx. 1 use per hour over a 10-hour window. Net/cycle calculated as: \$4 gross rev - \$0.20 rev share (5%) = \$3.80 - \$0.55 operating cost = \$3.25/cycle. Platform fee of \$79/month per kiosk (founding owner rate) is then deducted from monthly total.

THE SCALING ROADMAP

THE SCALING ROADMAP

From one kiosk to \$10,000 per month.

It's 11am on a Tuesday. You're not in an office. You check your dashboard, and see your kiosks earned money while you slept. No staff. No inventory. No complaints.

That's what the math builds toward.

One kiosk. One venue. At 20 cycles a day, your first kiosk generates \$2,019 net every month and pays for itself in under four months. The money it earns after that funds kiosk two. kiosk two funds kiosk three.

kiosks	Cycles/day	Monthly net	Annual net	Milestone
1	20	\$1,898	\$22,777	Prove the model
2	20	\$3,796	\$45,554	Reinvest and expand
3	20	\$5,694	\$68,331	kiosk 1 ROI fully recovered
6	20	\$11,388	\$136,662	\$10K MRR
10	20	\$18,981	\$227,770	Portfolio operator
20	20	\$37,962	\$466,540	Territory dominant

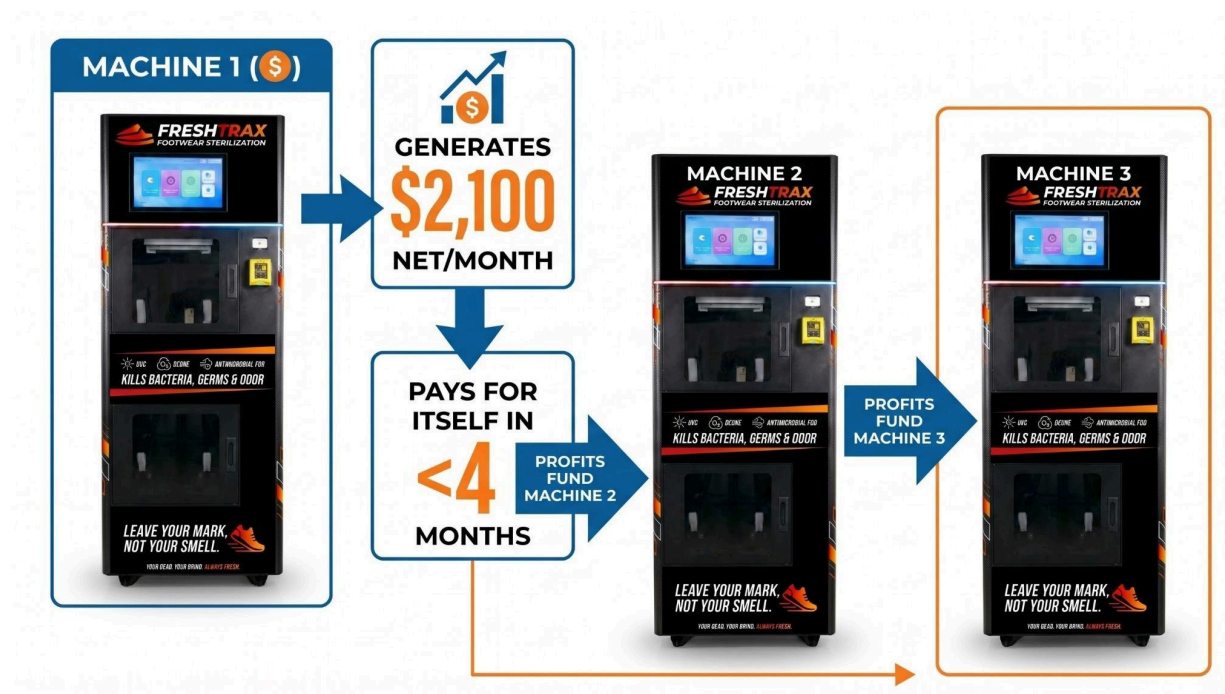

Highlighted = \$10K MRR threshold. 20 cycles/day per kiosk at \$3.25 net. After rev share and operating cost. \$79/month per-kiosk platform fee already deducted from all figures. We believe in transparency, because I would too.

At 6 kiosks you've replaced most salary.

At 10, you're running a quarter-million-dollar business from your phone.

At 20, you own a territory no competitor can enter.

The 3-phase playbook

Months 1–3: Deploy and validate.

Place kiosk one in your best Tier 1 venue. Target 15–20 cycles per day.

Months 4–6: Reinvest and expand.

First-month revenue funds kiosk two. Monthly net is now \$4,200.

Months 7–12: Lock the territory.

kiosks three to five deployed. Monthly net hits \$6,300 to \$10,500. kiosk one is fully paid off — every dollar it earns from here is pure profit.

You don't need capital, debt, or years of patience. You need one kiosk, one good venue, and the discipline to reinvest for twelve months.

OPERATOR VISIBILITY

OPERATOR VISIBILITY

Every cycle tracked. Every dollar visible. In real time.

Freshtrax gives venue partners a full-visibility dashboard to manage every aspect of their footwear sanitization kiosk, remotely and in real time.

Your kiosk. Your data. Your control.

FEATURE	BENEFITS
REVENUE & MONETIZATION	
Payment Management	Nayax - Visa, Mastercard, AE
Currency Management	Serve a wider audience without friction
Coupon & Discount Management	Drive repeat visits and upsell through targeted deals
OPERATIONAL VISIBILITY	
Data Overview	Make data-driven decisions on hours, placement, and pricing
Menu Management	Update services in real time without touching the device
KIOSK CONTROL & UPTIME	
Device Management	Monitor and control hardware remotely, save time and costs
Fault Reporting	Catch issues early, minimize downtime, protect revenue
TEAM & ACCESS MANAGEMENT	
Role Management	Assign the right access to the right people, scale your team safely

Less Downtime

Faster fault detection keeps your kiosk earning.

More Revenue

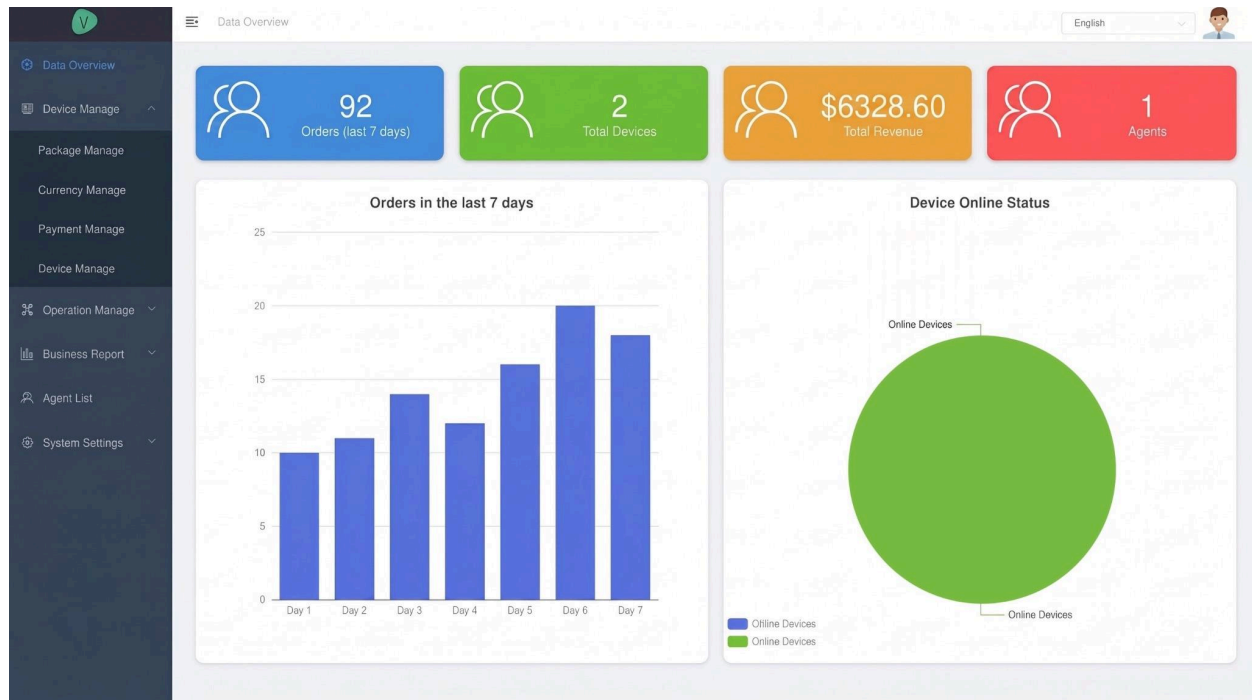

Flexible payments and promos capture every opportunity.

Full Visibility

Live data so you never manage in the dark.

Easy to Scale

Role controls grow with your team.

100/page

THE OFFER

WHAT YOU GET AS A FOUNDING OWNER — AND WHAT IT COSTS.

We could open this to any operator. We're not. We're giving 20 people the chance to enter this market at founding terms — before it has a name, before territories fill up, before the window closes. Here is exactly what that includes.

What's included	Value
Freshtrax kiosk — fully assembled and tested Save \$1000. Ships ready to deploy. Plug in, place it, and it works from day one.	\$8,850 \$7850
Tier 1 venue placement support We help you identify and close your first high-traffic gym, club, or arena placement.	\$1,500 value
Territory strategy onboarding call 1:1 session to map your local Tier 1 venues and prioritize your deployment targets.	\$500 value
First-mover exclusivity on claimed locations Once you claim a venue, no competing operator can be placed there.	Exclusive
Platform fee locked at \$79/month per kiosk for life (Standard rate: \$99/month per kiosk)	\$240/yr savings per kiosk
Total Value	\$11,090+

Your investment as a Founding Partner

\$7,850 USD

One-time kiosk purchase. \$79/month per kiosk platform fee.
0% rev share on your founding kiosk, forever

Only 18 out of 20 Founder slots now available. Once filled, Founding Partner pricing and the fee waiver close permanently. Territory exclusivity is first-come, first-served — if another operator claims your gym or club first, that location is gone.

*updated Apr 28, 2026

The Freshtrax performance guarantee

Follow the operator playbook and hit 10 cycles per day within 90 days of placement — or I'll refund your kiosk in full. You cover return shipping. That's it.

Your downside is the cost to return the kiosk. Your upside is potentially making \$38,325/year.

I'm not offering this because I expect to honor it. I'm offering it because I know what this kiosk does when the playbook is followed.

Why Founding Partner terms are different from any future offer

We accept a maximum of 4 operators per metro market. Once your territory fills, three things change permanently: the fee waiver ends, Founding Partner pricing closes, and the best venues in your city are gone.

Right now every major market is open, except Richmond, Canada and Vancouver, Canada. The operators who move first claim the highest-traffic venues. The operators who wait find those venues already taken.

This isn't urgency for the sake of urgency. It's geography. And geography doesn't wait.

Questions we get asked

“I’ve never run a kiosk business before.”

Neither had our first operators. The kiosk runs itself — no staff, no inventory, no daily management. Your role is placement and occasional check-ins. If you can check an app and make a phone call, you can run this business.

“What if my venue doesn’t generate enough traffic?”

Venue selection is the only variable that matters — which is why placement support is included in your package. Most Tier 1 gyms see 150 to 400 visits per day. At a 5% usage rate, you’re hitting target. If a venue underperforms, we help you relocate — that’s in the guarantee.

“What stops a gym from buying their own kiosk directly?”

Sourcing this kiosk requires direct manufacturer relationships in Asia, custom engineering, and ongoing technical support. The gym’s business is members, not kiosks. The model gives them a premium amenity at zero cost and zero effort — there’s no reason for them to own it.

“What if someone copies this once it takes off?”

They will eventually. But your advantage isn’t just branding — it’s physical. Once your kiosk is in a venue, no competing kiosk enters it. You’re not racing to build a brand. You’re racing to place kiosks.

“The ROI looks optimistic. What if I don’t hit 20 cycles a day?”

Our conservative scenario is 10 cycles per day. At that rate you still clear \$11,645 in Year 1 net profit on a \$7,850 investment, with full ROI in 8.1 months.

“Why only 20 Founding Partner slots? Is this a sales tactic?”

It's a capacity constraint. Founding Partners get hands-on placement support and direct access to our team. We can't deliver that to unlimited operators. When slots fill, the fee waiver ends, pricing increases, and the best venues in your city are gone.

“Is this a franchise, MLM, or scheme?”

No royalties. No recruiting. You own the kiosk outright and keep the profit. It's a straightforward kiosk business — nothing more.

What exactly is the guarantee?

If you follow the Freshtrax operator playbook (will be provided as part of your onboarding) and your kiosk doesn't hit 10 cycles per day within the first 90 days of placement, you get a full refund on the kiosk cost. You just cover the cost of shipping back the kiosk.

“My partner needs to be convinced. How do I explain this?”

Show them this document and the economics page. The question is simple: if a \$7,850 investment generates \$24,237 in Year 1 and pays itself back in under four months — what's the cost of not doing it? The risk isn't the \$7,850. The risk is watching someone else lock your territory while you were thinking about it.

NEXT STEPS

If this made sense to you — let's talk.

You've seen the science. You've seen the market. You've seen the numbers. The only question left is whether your territory is still available.

01**Book a free 30-minute discovery call**

We check territory availability in your market, walk through the ROI model for your specific venue targets, and answer every question you have. No pitch. No pressure. Just clarity.

02**We map your territory**

Before you commit to anything, we identify the exact Tier 1 venues in your area and tell you which ones are still unclaimed. You get full visibility before making any decision.

03**You decide**

If it makes sense, you move forward as a Founding Partner. If it doesn't, you walk away with more market intelligence than you came in with. Either way, you win.
